

Instruction Manual of your USB Lighter:

The environmental protection electronic cigarette lighter is powered by a rechargeable battery. The battery can be charged and discharged hundreds of times. (Please charge battery before it's discharged completely, which can extend the life of battery.)

This product's USB interface is only used for charge. This products USB interface can be connected to your computer, mobile phone chargers and any other charger whose output voltage is less than DC 5V +/- 0,5V and output current is less than 3000mA.

If you use this product the first time or after long time, please connect the charger, then disconnect and reconnect the charger to start charge, the blue LED light will light to indicate that the charging process has started. Please stop charge as soon as it's fully charged (the fully charge generally takes 3 hours), when fully charged the LED light will stop lighting. Don't connect the fully charged device to power for a long time, as the overcharge will shorten the life of battery.

Currency Check with the LED light of your device:  
You can identify fake from real currency by searching for fluorescendng details in your currency.

**WARNING:**  
Do not place this product into the water or liquid! This may lead to short-circuiting!
