## SAFE INSTRUCTIONS FOR BATTERY

### ATTENTION

- Lithium-ion batteries can easily rupture, ignite, or explode when exposed to high temperatures, or direct sunlight.
- Do not disassemble or modify the battery. The battery contains safety and protection devices, which, if damaged, may cause the battery to generate heat, explode or ignite.
- The battery should not be removed until it is not completely discharged.
- The battery must be removed from the appliance before it is scrapped.
- The battery must be disposed safely.
- Remove the battery before disposing of the product (Refer to part: "Nano Sim/ TF card insertion" (see steps from 1 to 3).

## MAINTENANCE

- Clean only with a dry cloth.
- It is important that no liquid reaches the inside of the unit.

**STORAGE:** Store the product in low temperature, dry and ventilated place.

**WARNING:** You should not dispose of this device with your household waste. A selective collection system for this type of product is implemented by your local authorities. Please contact your local authorities to find out how and where collection takes place. These restrictions apply because electrical and electronic devices contain dangerous substances that have harmful effects on the environment or on human health and must be recycled. This symbol indicates that electrical and electronic devices are collected selectively. The symbol shows a waste container crossed out with an X symbol.
